

## **VIDEO ONE: Rehabilitation Services**

**Andrea Dolak:** A person that would go into rehab services is someone who wants to be in the human services field. It's a helping profession and it's someone who wants to help other people. It's not so much about what you do, but what you do for another person and how they are benefiting from it.

We can do such a variety of things. I mean, I coordinated my education so that I could work with children. I know others who have coordinated their education so they could work with seniors. I know people who are going into PT, OT, speech therapy, any of that thing, and we were all in the same College of Education Rehabilitative Services major.
