

Who We Serve

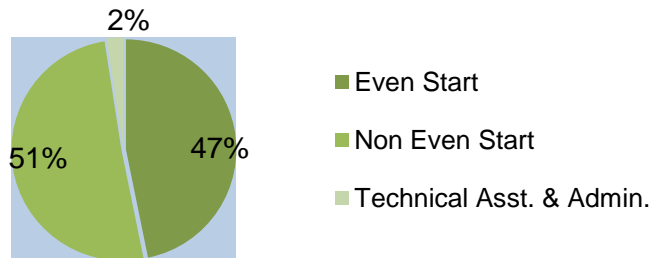

Texas funded 42 local programs who served 2,451 families that were considered to be **“most in need”** of family literacy services.

Community Support

Even Start Family Literacy Programs are supported by the community. Even Start funds are matched by local communities to provide the full array of family literacy services. Texas programs receive local share contributions for adult literacy and ESL, early childhood assessment and intervention services, facilities and school district transportation.

The most frequently reported sources of local share include Title I Part A, adult education funds through the Workforce Investment Act, private foundations, local school districts, non-profit organizations, corporations, other state and federal grants and Head Start/Early Head Start.

The Texas Adult Education and Family Literacy Collaboration

2007-2008 EVEN START REPORT CARD

Even Start brings returns on your investment.

The Even Start Family Literacy Program is designed to break the cycle of poverty and low literacy in families. Even Start provides services and support to at-risk families so they can be successful at work, at school and in their communities. In Even Start, children and their parents learn together.

What makes Even Start unique? Even Start is a one-stop family intervention program. Parents learn that they are their children's first and most important teachers. Parents acquire basic skills, including English and life skills, and have the opportunity to earn a high school credential. They learn how to be educational role models for their children and learn strategies to support their children's learning. Even Start provides a rich early childhood education for children age birth through 7 while their parents attend basic skills and life skills classes. Children and parents learn together through interactive literacy activities at school and at home.

The state of Texas is committed to Even Start as a way to ensure that all children enter school ready to learn. Research has shown that preschool children who are enrolled in Even Start for three months or more score significantly higher on developmental tests than newly enrolled children. The more their parents participate in Even Start, the higher the children score.

The State of Texas Even Start program achieved 15 of 16 required quality indicators, thereby earning a rating of Commended

**15 out of 16
COMMENDED**

14-16 indicators - COMMENDED
12-13 indicators - RECOGNIZED

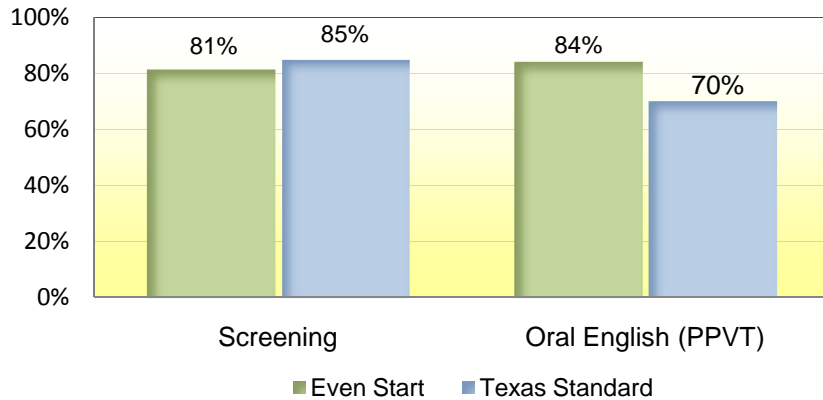

10-11 indicators - MET STANDARDS

Children's Achievements

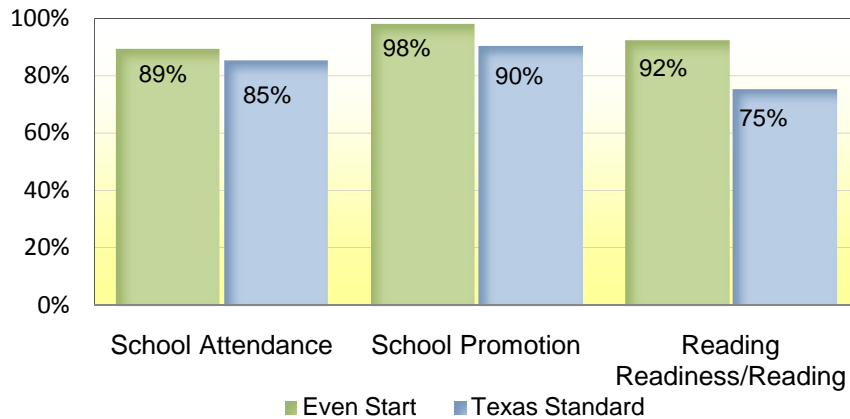

School readiness is a major objective of the Even Start Program. Children ages 0-3 years are screened for developmental delays and referred to local agencies when appropriate. Research-based curriculum and a well trained staff provide for a rich learning environment. Families and their children are provided intensive educational services with the end result of increased success for school-aged children.

Early Childhood Achievements

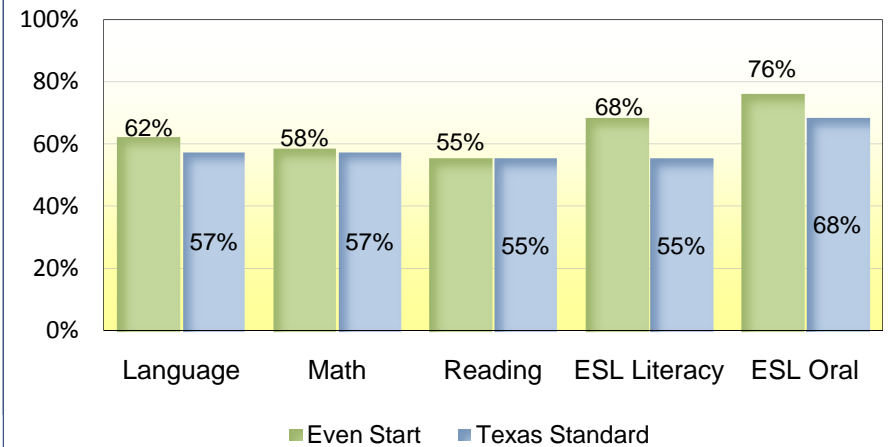

Kindergarten - 2nd Grade Achievements

Parents' Achievements

Even Start parents attend classes in English as a second language or Adult Basic Education. See how our parents did last year compared to Texas standards in Reading, Language, Math, Oral ESL, and ESL Literacy skills (as measured by the TABE or BEST/BEST Plus).

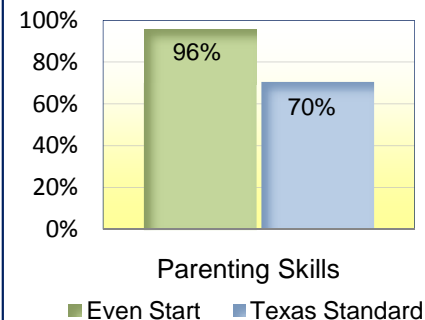

Parent Academic Gains

Even Start parents also **attend parenting classes**. This chart shows how our parents improved their parenting skills last year as measured by the *HOME Inventory*.

Even Start parents attend class regularly and **spend many more hours in class** than non-Even Start adult education students.

Parenting Achievements
